Resources for Nonprofits

- DYCD has given providers UPDATED guidance on how to handle damaged documents in the wake
 of Hurricane Sandy, and will no longer require bids from document restoration companies. Please
 note that these instructions apply to all contracts you have with DYCD, and should cover the
 period FY 07 to the present. Please further note that DYCD will need a written request from you,
 including everything listed below, in order to consider your request for document disposal.
 - Certification from you that there is no Comptroller audit or any pending litigation,
 claim, or investigation related to any of your City contracts.
 - An inventory of hard copy documents that were damaged or destroyed, with as much specificity as possible. The list should be augmented by computer records. So, for instance, you can put down "Individual participant files for NDA Contract #xxx for FY 07", and attach to it the computer record of all the participants in that program for that year. Any other program-related documents, such as correspondence with DYCD, should be listed and accompanied by computerized records, where possible.
 - An inventory of hard copy documents relating to budget and fiscal matters that were damaged or destroyed, for instance, receipts that would be used to back up claims submitted to DYCD for reimbursement. Again, the list should be accompanied by any computerized records that relate to these documents.
 - Video and/or pictures of damaged documents, file cabinets, and office damage.
 - A list of all equipment or furniture purchased with DYCD funds that were lost or damaged.

- Once you have compiled the above, please send the package to us with a cover letter explaining that you are requesting approval for disposal of documents. Once we receive this request in writing, we will give you a written response on how to proceed and/or a waiver of the document retention provisions of the contract.
